## Education

- **Indian Institute of Information Technology Nagpur** — Nagpur, India
  *Bachelor of Technology - Computer Science (AI-ML specialization); CGPA: 7.53* — *Aug 2023 – Present*
  - **Relevant Coursework:** Databases, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Operating Systems

## Experience

- **Kalpit Ltd** — Remote
  *Product & AI Consultant Intern* — *Jan 2026 – Present*
  - **Owned discovery-to-delivery**: Contributed to product decisions in an Agile setup—translated user needs into PRDs and acceptance criteria, groomed the backlog, and drove features through Jira sprints from problem framing to launch.
  - **Defined metrics & prioritized ruthlessly**: Established relevance/grounding evaluation criteria for a hybrid RAG search product on a 15,000-page corpus, then weighed user value against effort to sequence a 5-stage pipeline—focusing build on the changes that most improved result quality.
  - **Drove a cost-vs-value trade-off**: Championed a serverless re-architecture cutting infra cost ˜85% ($71 → $8/mo) while sustaining performance—balancing business constraints with product experience.

## Product Projects

- **AI Fitness & Calorie Tracker — Product Case Study & Prototype** — Personal Project
  *Product Discovery, MVP Design, AI-First Product* — *2026*
  - **Identified an underserved user problem**: Framed the insight that Indian users eating home-cooked meals (roti, sabzi, dal) can't realistically weigh food in grams—breaking every manual calorie-tracking app; scoped the problem as effortless tracking for home-cooked diets.
  - **Defined an AI-first MVP & North Star**: Scoped an MVP around AI meal recognition (photo → calories/macros), a dashboard, and Google Fit sync—prioritized via impact-vs-effort—with Daily Active Users as the North Star; built a working prototype and outlined a free-to-premium GTM.

- **AI Contract-Review Decision-Support Product** — Aug 2025 – Oct 2025
  *Legal-Tech, Regulated-Domain AI, Workflow Automation* — *GitHub | HuggingFace*
  - **Solved a workflow pain point**: Built a decision-support system that tells legal professionals which contract clauses need human review and which can be auto-cleared—cutting review load by surfacing only the highest-risk clauses first.
  - **Fine-tuned a domain model on real data**: Fine-tuned Legal-BERT on the CUAD dataset (510 real contracts, 13,000+ annotated clauses), reaching 78% accuracy / 0.75 F1 across 41 clause types mapped to a 5-tier review framework; shipped structured CSV/PDF outputs for downstream legal workflows.

## Leadership & Positions of Responsibility

- **Co-Lead — Orator, Public Speaking & MUN Wing (IIIT Nagpur)** — Nagpur, India
  *Model UN Leadership & Event Ownership* — *Aug 2024 – Aug 2025*
  - **Owned a 200+ delegate event**: Held a leading role overseeing the organisation of IIITN-MUN 3.0 (200+ delegates)—owning the roadmap and coordinating logistics, content, and cross-functional teams end-to-end.
  - **Led national delegations & won awards**: Led IIIT Nagpur delegations to MUNs across the nation, earning multiple national-level awards; built negotiation, persuasion, and consensus-building skills under pressure.

- **Web3 Lead — Elevate, Development Wing (IIIT Nagpur)** — Nagpur, India
  *Led a team of 200 students; ran workshops and technical sessions* — *Aug 2024 – Aug 2025*

## Skills

- **Product**: Product Discovery, MVP Definition, PRD Writing, Roadmapping, Prioritization (RICE / Impact-Effort), North Star & Product Metrics, User Research, GTM Strategy, Regulated-Domain AI
- **Tools**: Figma, Jira, Notion, Agile / Sprints, Git, Excel, SQL, Mixpanel, Google Analytics, Claude
- **Technical**: Python, JavaScript, C/C++, Java; AI/ML, LangChain, RAG, Prompt Engineering, FastAPI
- **Soft Skills**: Stakeholder Management, Cross-functional Collaboration, Communication, Public Speaking, Leadership, Ownership
